This code will remove sp lock in some models
But also changes IMEI to 447967-89-400044-0,

Samsung s300 unlock code

enter these 5 codes without sim card in phone!
your phone should then be unlocked

1. *2767*63342#
2. *2767*3855#
3. *2767*2878#
4. *2767*927#
5. *2767*7822573738

Samsung v200 unlock codes

Enter these codes into phone without sim in phone

This will not work on some versions

1. *2767*63342# then press green button
2. *2767*3855# then press green button
3. *2767*2878# then press green button
4. *2767*927# then press green button
5. *2767*7822573738# then press green button

*#06# -> Displays imei

Mep lock menu

*01763*6371#

Then go to ssttings,then network settings,then mep

*01763*8371# -> Shows software version

*#06# -> Displays imei

*#06# then press left long button -> Displays software info

SP Unlock *#0003*(secret code 8 digits)#

*#0000# then the green button -> Reset Language to automatic selection:

*#06# -> Displays imei

*#7465625*12*xxxxxxx# -> where xxxxxxxx is the unlock code

*#7465625*XX*xxxxxxx# -> where xxxxxxxx is sim code

XX can be:

12 for NCK lock

22 for Provider Lock

32 for Network Lock

42 for SIM code Lock

52 for Subset Lock
